PROJECT SUMMARY

Concord, with teaming partner Infiniti Energy Services, has been awarded the Teaneck Board of Education Solar Power Purchase Agreement (PPA) for a total of 905 kW DC. The project includes rooftop solar at six (6) schools within the Teaneck Board of Education School District.

The Project Team is currently in the process of performing roof assessments, utility interconnect applications, electrical engineering, and structural engineering to develop permit documents for permit submission. The construction for the project is expected to begin in the Fall of 2020 with a project completion expected first quarter of 2021.

To bolster the deal for the school district, Concord and Infiniti brought the financing partner, Empower Energies, to the table with the Teaneck Board of Education to streamline the process and financial close of the project.

SYSTEM SIZES

- Teaneck High School – 119 kW DC
- Eugene Field Administration – 110 kW DC
- Thomas Jefferson Middle School – 265 kW DC
- Whittier Elementary School – 125 kW DC
- Benjamin Franklin Middle School – 172 kW DC
- Lowell Elementary School – 114 kW DC
