ENGINEERING SERVICES

Camden Partners Tower Equities, LLC (comprised of Conner Strong & Buckelew, NFI, and the Michaels Organization) constructed a new 18-story office building on the waterfront in Camden, NJ. The building serves as corporate headquarters for each firm. The high rise, multi-story facility over a parking garage totals approximately 350,000 GSF. With the starting point of a lobby on the ground floor, the first floor also is comprised of the onset of the parking garage which continues up through the 7th floor. The 8th floor houses the kitchen/cafeteria/serverly, meeting, fitness, locker, and multi-purpose spaces. Floors 9 through 18 are populated with office space and the Conference Center. The top floor Conference Center will be for used for meeting rooms and flex space, while the roof will be designed with a snowmelt system to accommodate a heliport.

Concord is the Engineer of Record for Mechanical, Electrical, Plumbing, Fire Protection and Energy Engineering services for the new Camden Partners Tower building. Our team was capable of providing high-efficiency, detailed design to meet the expedited design and construction pace of the project. All engineering documentation was provided in Revit format to support BIM and field coordination.

Concord provided all required Energy Engineering with our in-house staff and conducted the work in accordance with ASHRAE 90.1, LEED and the requirements of the NJ Clean Energy P4P New Construction Program. The Camden Partners Tower is planned and constructed to obtain LEED Silver Certification (Certification Pending).
